

Call for Papers

Special Issue on Solid-State Microwave Heating

AMPERE Newsletter is planning a Special Issue on the various aspects of solid-state technologies of RF and microwave heating, to be published on June 30, 2016.

Authors who wish to contribute to this issue are kindly requested to [contact the Editor before April 30, 2016](#) in order to coordinate the contents of their articles.

Info on Regular issues

AMPERE Newsletter welcomes submissions of articles, briefs and news on topics of interest for the RF- and microwave heating community. These may include:

- *Research briefs and discovery reports.*
- *Review articles on R&D trends and thematic issues.*
- *New inventions and patents.*
- *Technology-transfer and commercialization.*
- *Safety, RFI, and regulatory aspects.*
- *Technological and market forecasts.*
- *Comments, views, and visions.*
- *Interviews with leading innovators and experts.*
- *New projects, openings and hiring opportunities.*
- *Tutorials and technical notes.*
- *Social, cultural and historical aspects.*
- *Economical and practical considerations.*
- *New products and services.*
- *Upcoming events, new books and papers.*

AMPERE Newsletter is an ISSN registered periodical publication hence its articles are citable as references. However, the Newsletter's publication criteria may differ from that of common scientific Journals by its acceptance (and even encouragement) of news in more premature stages of on-going efforts.

We believe that this seemingly less-rigorous editorial approach may accelerate the circulation of new ideas and discoveries among the AMPERE community; and consequently enrich our common knowledge, and excite new ideas, findings, and developments.

Please send your submission to the Newsletter or any question, comment or suggestion in this regard directly to the AMPERE-**Newsletter Editor**:
